Education

2013
2017

Doctor of Philosophy in Statistics, *Purdue University*, West Lafayette, IN

Advisors: Dr. William Cleveland and Dr. Ryan Hafen; Emphasis: Large Data Visualization

National Science Foundation Graduate Research Fellowship Recipient (2012-2017)

2013
2014

Master of Science in Mathematical Statistics, *Purdue University*, West Lafayette, IN, 3.69/4.0

2012
2012

Doctor of Philosophy in Statistics, *Rice University*, Houston, TX

Advisor: Dr. Hadley Wickham

2006
2010

Bachelor of Science in Computer Engineering, *Iowa State University*, Ames, IA, 3.77/4.0

Work Experience

2022

Posit, Senior Software Engineer

- Core developer of Shiny python package, a python package that makes it easy to build interactive web apps straight from python.
- Architected and implemented full suite of Playwright testing controllers for every Shiny UI component. Tested in over 1000+ pytest tests distributed over parallel workers for quicker CI time per push to GitHub.
- Contributed to Shinylive Assests to be able to run Shiny for R and Python. Created both R and Python packages to help users export their app for free, static hosting.

2018
2021

Posit (formerly RStudio), Software Engineer

- Core developer of Shiny, an R package that makes it easy to build interactive web apps straight from R.
- Architected, developed, and automated the nightly testing of 150+ Shiny applications using GitHub Actions over the Mac/Windows/Linux operating systems and 5x R versions.
- Successfully converted core JavaScript code into TypeScript without minor bugs
- Helped develop and maintain over 45 R packages within the Shiny ecosystem

2011
2012

Metamarkets, *San Francisco, CA*, Software Engineer

Client-Side (CoffeeScript)

Front-end Server (Node.js & CoffeeScript)

- | | |
|---|---|
| <ul style="list-style-type: none">○ Implemented URL routing framework which displayed consistent URLs between users○ Implemented DVL visualizations using D3 for all interactive data visualizations○ Utilized DVL library to make all variables reactive to dependency value changes○ Modularized code to be reusable/plugin-play○ Reduced website startup time for faster loading○ Trimmed data queries to grab new data only to reduce unnecessary server load○ Refined anomaly detection algorithms to highlight visual anomalies | <ul style="list-style-type: none">○ Automated server deployment process to allow any engineer to deploy services○ Created server cluster to prevent request failure○ Developed company/user management system○ Developed configuration files to determine where and how data is displayed○ Integrated configuration files to help automate self-serve data processing○ Maintained client security○ Communicated with multiple back-end services to maintain a consistent client interface |
|---|---|

2016
2018

Gates Foundation: HBGDki, *Remote*, Tool Development Team

- Provided customized summary statistics in timely manner for 75+ datasets to feed into visualization applications
- Maintained data security while coordinating with five other data scientists
- Created and maintained shell R packages for standardized R package development

2016
2017

DARPA: XDATA and D3M Grants, *Purdue University*

- Collaborated remotely with Hafen Consulting, Kitware, and KnowledgeVis to produce a web interface for SMEs to interact with machine learning pipelines created by other working groups
- Completed multiple miniature hack-a-thons with my team to present consistent findings of our results
- Served as lead point-of-contact for integrating services with other working groups

2017

Big Data Analytics: Statistics and Data Visualization, Purdue University, Teaching Assistant

- Taught several lectures to help students understand how to use R for *big* data
- Explored easy to understand concepts in class that have difficulty scaling to larger data

2012/2015

Hadley Wickham R Master Class, San Francisco, CA and Chicago, IL, Teaching Assistant

- Fielded advanced programming technique questions from students to solidify content presented
- Aided students in developing R packages on multiple computing platforms

2008
2010

Novartis Pharmaceutical R&D, Basel, Switzerland, Data Scientist Intern

- Created a time management tool using gantt charts to help management quickly display employee availability
- Created a web-based tutorial consisting of examples of the most common graphics produced when using different layouts by “white-box”ing complex visualizations into reusable plotting layers
- Worked cohesively with the top 15 statisticians within Novartis

Honors and Awards

2012
2017

National Science Foundation Graduate Research Fellowship

- Received a three-year fellowship (to be used within five years) to pursue graduate studies in a science based field
- Only awardee for Computational Statistics of the thirteen statistical recipients in 2012
- One of five recipients from Iowa State University in 2012

2015

Visiting Scientific Researcher, Monash University, Melbourne, Victoria, Australia

- Presented latest research on gq1r to WOMBAT2016
- Collaborated with NUMBAT on large data exploration tools

2011/6

Best Dynamic / Interactive Visualization, Data Insight (SF), San Francisco, CA

- Team of four worked together over the weekend to produce an interactive visualization
- Leaned on each other's skills to provide an application that highlighted our data and visualization talents

2011/4

National Science Foundation Graduate Research Fellowship, Honorable mention

Publications

Journal Articles

2017

Presentations

2024/8

Schloerke, B. “Editable data frames in Shiny for Python” posit::conf. Posit. Aug. 2024. Speech.

2024/6

Schloerke, B. “shinylive: Serverless Shiny apps” YouTube. Posit. Jun. 2024. Video.

2024/3

Schloerke, B. “shinylive: Serverless Shiny apps” Shiny Conference. Appsilon. May. 2024. Speech.

2023/3

Schloerke, B. “Lessons learned from testing 2500+ Shiny Apps every day” Shiny Conference. Appsilon. May. 2023. Speech.

2022/10

Schloerke, B. “shinytest2: Regression Testing for Shiny Applications” Shiny Day. Johnson and Johnson. Oct. 2022. Speech.

2022/7

Schloerke, B. “shinytest2: Regression Testing for Shiny Applications” rstudio::conf. RStudio. Forest Heights, MD. July. 2022. Speech.

2022/6 Schloerke & Mostipak. "Programming Games with Shiny — Roll the Dice: with Quosures!" YouTube. Posit. Jun. 2022. Video.

2022/5 Schloerke & Mostipak. "Programming Games with Shiny — Roll the Dice" YouTube. Posit. May. 2022. Video.

2022/5 Schloerke & Mostipak. "Programming Games with Shiny — Guess the Number" YouTube. Posit. May. 2022. Video.

2022/5 Schloerke & Mostipak. "Programming Games with Shiny — Dragon Realm" YouTube. Posit. May. 2022. Video.

2022/5 Schloerke, B. "shinytest2: Regression Testing for Shiny Applications" R in Pharma working group. May. 2022. Webinar.

2022/4 Schloerke, B. "shinytest2: Regression Testing for Shiny Applications" Shiny Conference. Appsilon. Apr. 2022. Speech.

2022/2 Schloerke, B. "Maximize computing resources using future_promise" YouTube. Posit. Feb. 2022. Video.

2021/8 Schloerke, B. "Plumber: Asynchronous Route Execution with Barret Schloerke" YouTube. Harvard Data Science Initiative. Aug. 2021. Webinar.

2021/3 Blaire & Schloerke. "Plumber: Asynchronous Route Execution with Barret Schloerke" RStudio Webinar. Mar. 2021. Webinar.

2021/1 Schloerke, B. "plumber + future: Async Web APIs" rstudio::global. Jan. 2021. Speech.

2020/8 Schloerke, B. "Episode 14: Shining a Light on learnr (Barret Schloerke Part 3)" Shiny Developer Series with Eric Nantz. Aug. 2020. Podcast.

2020/8 Schloerke, B. "Episode 13: Inside Plumber 1.0 (Barret Schloerke Part 2)" Shiny Developer Series with Eric Nantz. Aug. 2020. Podcast.

2020/8 Schloerke, B. "Episode 12: Barret Schloerke Part 1 (reactlog)" Shiny Developer Series with Eric Nantz. Aug. 2020. Podcast.

2020/04 Schloerke, B. "Reactlog 2.0: Debugging the State of Shiny" Remote Meetup: Shiny Deep Dive. Statistical Programming DC. Washington D.C. Apr. 2020. Speech.

2019/11 Schloerke, B. "shinytest2: Reproducible Shiny apps with shinytest2" Autumn Biostatistics Conference US (ABACUS). GlaxoSmithKline. Phoenixville, PA. Nov. 2019. Speech.

2019/5 Schloerke, B. "Debug Large Data Apps: shiny + reactlog + sparklyr" Advanced R workshop. Northeastern University. Boston, MA. Mar. 2019. Speech.

2019/1 Schloerke, B. "Reactlog 2.0: Debugging the State of Shiny" rstudio::conf. RStudio. Austin, TX. Jan. 2019. Speech.

2018/8 Schloerke, B. "Shiny" DATANAUTS. NASA. Washington, D.C. Aug. 2018. Speech.

2017/4 Schloerke, B. "Cognostics: Metrics enabling detailed interactive visualization of big data" CSESC2017. Purdue University, West Lafayette, IN. Apr. 2017. Speech.

2017/1 Schloerke, B. "tidyverse[c(\"magrittr\", \"dplyr\", \"tidyr\")]" Purdue Graduate Statistics Seminar. Math, West Lafayette, IN. Jan. 2017. Speech.

2016/8 Schloerke, B. "Cognostics: Metrics enabling detailed interactive visualization of big data" Joint Statistical Meeting. Chicago, IL. Aug. 2016. Speech.

2016/6 Schloerke, B. "ggduo: Pairs plot for two group data" UseR!2016. Stanford University, Stanford, CA. Jun. 2016. Speech.

2016/6 Schloerke, B. "High Performance Computing for High-Resolution Analysis of Big Data and Small" Spring Research Conference. Illinois Institute of Technology, Chicago, IL. Jun. 2016. Speech.

2016/4 Schloerke, B. "Analysis and Visualization of Large Complex Data with Tessera". Graduate Statistics Seminar. Purdue, West Lafayette, IN. Mar. 2016. Speech.

2016/3	Schloerke, B. "Analysis and Visualization of Large Complex Data with Tesseract". Graphics Research Group Seminar. Iowa State University, Ames, IA. Mar. 2016. Speech.
2016/2	Schloerke, B. "Analysis and Visualization of Large Complex Data with Tesseract". NUMBAT Seminar. Monash University, Melbourne, VIC AUS. Feb. 2016. Speech.
2016/2	Schloerke, B. "GraphQL: An R server implementation". Wombat2016. Melbourne Zoo, Melbourne, VIC AUS. Feb. 2016. Speech.
2015/10	Schloerke, B. "Web Scraping with R" American Credit Acceptance. Spartanburg, SC. Oct. 2015. Speech.
2015/2	Schloerke, B. "Trelliscope: D&R visualization tool" Big Data Visualization. Fields Institute Toronto, CAN. Feb. 2015. Speech.
2014/10	Schloerke, B. "ggplot2: displaying spatial and temporal data" Spatial Statistics Seminar. Recitation, West Lafayette, IN. Oct. 2014. Speech.
2014/2	Schloerke, B. "Reducing Working Environment Inefficiencies" Graduate Statistics Seminar. Haas, West Lafayette, IN. Feb. 2014. Speech.
2010/9	Schloerke, B. "helpr: Help for R." Working Group Meeting. Snedecor Hall, Ames, IA. Sept. 2010. Speech.
2010/8	Schloerke, B. "GGally: A Plot Matrix for All Variable Types." Joint Statistical Meeting 2010. Vancouver Convention Center, Vancouver, BC Canada. Aug. 2010. Speech.
Lightning Talks	
2014/6	"git", Purdue Working Group
2011	"Sinatra: Simple Web Framework", "5 Tips for Running Node in Production", "Express: Node Router", San Francisco Bay Area

Projects

Posit

Advisors: Joe Cheng and Winston Chang

2023	shiny.render.data.frame, Editable data frames within Shiny for Python applications, <i>Posit</i>
2024	shiny.render.renderer, Extendable base class that creates renderers within Shiny for Python applications, <i>Posit</i>
2023	shiny.playwright, Playwright testing controllers for every Shiny for Python UI element, <i>Posit</i>
2023	shiny.pytest, Pytest integration for testing Shiny for Python applications, <i>Posit</i>
2023	shinylive for R , Export Shiny for R applications to a static folder to be hosted statically, <i>Posit</i>
2023	shinylive for Python , Export Shiny for Python applications to a static folder to be hosted statically, <i>Posit</i>
2023	shinylive assets , Assets required to run Shiny applications in the browser, <i>Posit</i>
2023	htmltools, Bootswatch + Bootstrap 5 themes for Shiny for Python, <i>Posit</i>
2023	shinyswatch, Bootswatch + Bootstrap 5 themes for Shiny for Python, <i>Posit</i>
2023	shiny, A web development framework for Python, <i>Posit</i>

RStudio

Advisors: Joe Cheng and Winston Chang

2019	shinycoreci, Regression testing for shiny-verse, <i>RStudio</i>
------	---

2018	shiny, Easy interactive web applications with R, <i>RStudio</i>
2021	htmltools, Tools for HTML, <i>RStudio</i>
2023	
2021	shinytest2, Testing for Shiny Applications, <i>RStudio</i>
2023	
2021	chromote, Headless Chrome Web Browser Interface, <i>RStudio</i>
2022	
2018	swagger, Dynamically Generates Documentation from a 'Swagger' Compliant API, <i>RStudio</i>
2022	
2021	plumberDeploy, Take screenshots of webpages from R, <i>RStudio</i>
2021

2021	
2018	gt, Easily Create Presentation-Ready Display Tables, <i>RStudio</i>
2019	
2018	plumber, Turn your R code into a web API., <i>RStudio</i>
2022	
2018	reactlog, Reactivity Visualizer for 'shiny', <i>RStudio</i>
2020	
2018	leaflet, R Interface to Leaflet Maps, <i>RStudio</i>

Purdue University

Advisors: Dr. Ryan Hafen and Dr. William Cleveland

2017	autocogs, Automatic Cognostic Calculations, <i>Purdue University</i>
2021	<ul style="list-style-type: none"> ○ "Automatically calculates cognostics for plot objects and list column plot objects. autocogs compliments trelliscopejs's panel interactions by producing multiple cognositc values for the visualizations displayed" ○ Generalized framework to produce consistent cognostics independent of visualization library utilized
2015	gqlr, GraphQL Server in R, <i>Purdue University</i>
2017	<ul style="list-style-type: none"> ○ "R server implementation of GraphQL, a query language created by Facebook for describing complex data queries independent of the storage format." ○ GraphQL provides a complete and human readable description of the data in your data schema and gives clients the power to query only for exactly what they need. ○ gqlr is a native R GraphQL implementation to be used with Relay in React javascript web applications
2016	GGally::ggduo, Generalized plot matrix for two-grouped data, <i>Purdue University</i>
2016	<ul style="list-style-type: none"> ○ Extension of ggpairs built on top of a ggmatrix object ○ Pairs plot for two group data ○ Readily useful for multiple time series analysis and canonical correlation analysis ○ Foundation function for 'ggnostic', a model diagnostic plot matrix, and 'ggts', a time series plot matrix ○ Funded by Google Summer of Code with final report
2015	GGally::ggmatrix, Generalized plot matrix, <i>Purdue University</i>
2016	<ul style="list-style-type: none"> ○ Handles arbitrary plot columns and rows ○ Used as display mechanism for all GGally plot matrix functions
2015	trelliscopejs, Create Interactive Trelliscope Displays, <i>Purdue University</i>
2017	<ul style="list-style-type: none"> ○ "Trelliscope is a scalable, flexible, interactive approach to visualizing data. This package provides methods that make it easy to create a Trelliscope display specification for trelliscopejs. High-level functions are provided for creating displays from within dplyr or ggplot2 workflows. Low-level functions are also provided for creating new interfaces." ○ Ported Shiny-based trelliscope R package to be built with React framework to increase interaction speed ○ Integrated with ggplot2 objects to seamlessly produce trelliscopejs applications
2016	rbokeh, R interface to Bokeh, <i>Purdue University</i>
2016	<ul style="list-style-type: none"> ○ "A native R plotting library that provides a flexible declarative interface for creating interactive web-based graphics, backed by the Bokeh visualization library." ○ Utilized non-standard evaluation within package to remove massive amounts of boilerplate

2013
2013

Bitcoin, DARPA XDATA

- Brought previous transaction exporter up to protocol
- Formatted escrow transactions to be matched easier
- Made “None” keys uniquely identifiable, rather than being treated the same
- Matched some “None” keys to valid output keys
- Updated User exporter to include all information available

Metamarkets

2011
2012

DVL, Data Visualization Legos, *Metamarkets*

- Functionally reactive JavaScript library to bind data to functions and visualizations

2012
2012

yalog, Yet Another Logger, *Metamarkets*

- Request logger to allow for personalized logging messages within different log levels

Rice University

Advisor: Dr. Hadley Wickham

2010
2010

helpR, *Help for R*

- Better Friendly HTML documentation with links to other packages, function aliases, and function sources. Finding information may be done with the comprehensive search bar.

2010
2010

VIGRE Program

- Performed exploratory analysis on the housing crisis
- Found, cleaned, and explored multiple data sets
- Created all outputs reproducible from scratch

Iowa State University Statistics Research

Advisors: Dr. Dianne Cook and Dr. Heike Hofmann

2010

GGally, *Extension to ggplot2, Iowa State University, Purdue University, and Google Summer of Code*

- “GGally extends ggplot2 by adding several functions to reduce the complexity of combining geometric objects with transformed data. Some of these functions include a pairwise plot matrix, a two group pairwise plot matrix, a parallel coordinates plot, a survival plot, and several functions to plot networks.”
- Maintained R package with 25k+ monthly downloads
- Collaborated with 10 major authors and many contributors
- Assembled multiple plot matrix functions to aid in full data exploration
- Integrated development process with lintr and testthat for code and output consistency

2010
2010

cranvas, *New Plotting Canvas for R*

- New plotting canvas for R. Produces more than a million points in less than a second.
- Dr. Wickham, Dr. Lawrence, Dr. Hoffman, Dr. Cook, Yihui Xie, Tengfei Yin, Marie Vendettuoli, Barret Schloerke

2009
2009

DescribeDisplay, *Reproduce GGobi images in R*

- Produce publication quality graphics from GGobi’s describe display plugin.

2009
2009

tourr, *Geodesic interpolation and basis generation functions*

- Implements geodesic interpolation and basis generation functions that allow you to create new tour methods in R.
- Dr. Wickham, Dr. Cook, Barret Schloerke
- Iowa State University and Rice University

2009
2009

American Statistical Association Data Expo, *Delayed, Cancelled, On-Time, Boarding ... Flying in the USA*

- Displayed airport delays caused by airport layout using multiple applications.
- Using Google’s KML language, R and wget, we produced Google Earth images with the runways highlighted.
- Iowa State University working group finished 2nd in the world competition.

2008
2008

Election Data, *Explore new ways to show the Electoral College for the 2008 Presidential Election*

- Created a custom cartogram of the United States with area proportional to the electoral vote of each state.
- Produced the ‘Electoral Vote Towers’ (inspired by New York Times 2000 Presidential Race) that quickly portrayed the electoral vote status.

2008
2008

DNA, *Viewing DNA sequence data*

- Extension of the polytope ranking.
- Created combinations of DNA sequences with a length of four which were displayed in a grand tour.

2008
2008

Polytope Ranking, *Visualizing ranked data*

- Created a model that would connect a ranked data set.
- Added jittered data points to each combination with the distance relative to the amount of points.

2007
2007

FaceOff, *'Lines and Dots' in the fourth dimension*

- Game created to calibrate users into viewing and thinking in the fourth dimension.
- Game is a combination of "Connect 4", "Tic Tac Toe", and "Dots and Lines."

2007
2007

IEEE Infovis Competition, *2007 Infovis visualization competition*

- Internet Movie Data Base (IMDB) competition.
- Worked on the genres of the database using the "Many Eyes" web application.
- Helped edit and produce the movie that the working group submitted.

2007
2007

GeoZoo, *A library of high dimension geometric objects*

- Functions to produce cubes, spheres, simplices, polyhedra, polytopes, tori, and mobius-like objects.
- Contains a new addition to the high dimension polytopes, a Hyper Ring Torus

Service

2010
2017

Clubs, *Iowa State University*, Developer

- Hip Hop Club (Dub H): Created an optimal sorting algorithm to place dancers into dances sans politics. Reduced semesterly data entry of 400+ records from 10 hours to 1 hour by allowing concurrent website inputs. Maintained current and historical semester attendance, waiver, and roster information for administrative purposes.
- Greek Week: Created an internet-based check-in system tied to university ID cards (2300+ members). Increased maximum check-in rate from one person every twenty seconds to one person every two seconds. Anonymity was maintained to prevent participation bullying within fraternities and sororities.

2017
2017

R for Data Science Seminar, *Purdue University*, Instructor

- Organized and presented course material in interactive weekly sessions
- Answered student's questions and adapted the presentations accommodate variable skill levels
- Coordinated with students maximize student attendance

2016
2017

Statistics Graduate Student Office, *Purdue University*, President

- Effectively ran a town hall meeting to positively address major concerns of statistics graduate students
- Organized "Graduate Student Mentor Program" at beginning of Fall Semester
- Organized "Esteemed Speaker" event with Dr. Arthur Dempster for the Spring semester

2014
2016

StatCom Assistant

- Coordinated and put on multiple events
- Helped in production of StatCom banner

2014
2016

Graduate Student Mentor
